Product Overview

High-Performance TCT Wood Cutting Blade

This 230mm professional-grade Tungsten Carbide Tipped (TCT) saw blade is engineered for precision wood cutting applications. Featuring 40 ATB teeth made from premium YG8 material, it ensures high performance, clean cuts, and long-lasting durability. The blade is treated with electrophoretic rust protection and sandblasted for a clean finish, meeting strict EN 847-1 safety standards.

Technical Specifications

Blade Dimensions

230 mm
Outer Diameter

40 T
Tooth Count

Material Composition

Component	Material	Hardness
Blade Body	50# Steel / 65Mn Steel	HRC 38-46°
Carbide Teeth	YG8 Tungsten Carbide	HRA 86-93°

Available Bore Sizes

20mm, 25.4mm, 30mm

Compliance & Features

Standards & Compliance

EN 847-1 Compliant • Rust Resistant • Fully Automatic Brazed

Safety Instructions

- Unplug saw before mounting
- Use mandatory saw blade guard
- Always wear eye protection
- Do not exceed maximum machine speed
