

235L Commercial Beverage Display Cooler

This 235L beverage display cooler is designed for commercial use. It features a glass door for product visibility, internal shelving, and maintains a consistent temperature.

Product Overview

Professional Beverage Merchandising

This 235L commercial display cooler is engineered to provide high-visibility storage for beverages in retail and hospitality environments. Featuring a transparent glass door and integrated interior lighting, it ensures products are presented attractively to customers while maintaining optimal serving temperatures. The unit includes adjustable internal shelving to accommodate various bottle and can sizes, making it a versatile solution for professional beverage cooling.
