

## 23A Alkaline Battery

This is a mercury-free alkaline battery with high capacity and stable voltage. It is suitable for devices requiring large electric current, such as MP3 players and motor-toys.

### Product Overview

#### High-Performance Mercury-Free Power

This mercury-free alkaline battery represents the latest in chemical power technology, offering significantly higher capacity than standard batteries. Designed for reliability and environmental safety, it provides stable voltage output suitable for high-drain applications. Its robust construction ensures minimal capacity loss during storage, making it a dependable choice for both continuous and intermittent use.

### Technical Specifications

Chemistry	Alkaline (Mercury-Free)
Battery Type	23A

### Performance Features

#### Key Advantages

- High capacity output
- Mercury-free construction
- Stable voltage delivery
- Low self-discharge during storage

Recommended Applications	MP3 Players, Pagers, Photoflash, Shavers, Motor-toys, Remote Controls, Key Fobs
