

2,4-Dihydroxybenzaldehyde Chemical Intermediate

2,4-Dihydroxybenzaldehyde is a chemical compound used as an organic intermediate. It is typically supplied in brown paper drums.

Product Overview

Industrial Chemical Intermediate

2,4-Dihydroxybenzaldehyde is a chemical intermediate utilized in various industrial applications. This substance is typically supplied in secure, industrial-grade packaging designed for safe storage and transportation. It serves as a foundational component for further chemical synthesis and processing.

Packaging and Logistics

Packaging Type	Brown paper drums with metal bands
Storage Features	Sealed, Industrial Grade, Transport Ready
