

24-Hour Mechanical Timer Switch

This mechanical timer switch automates electrical circuits on a 24-hour cycle. Its rotating dial and tappets enable multiple daily on/off events for controlling lighting, heating, and other appliances.

Product Overview

24-Hour Mechanical Timer Switch

The TH-187 mechanical timer switch provides a reliable solution for automating electrical circuits within a 24-hour cycle. Featuring an intuitive rotating dial with adjustable tappets, it allows for multiple on/off programming events throughout the day. This versatile device is ideal for managing lighting, heating, and various electrical appliances with precision and ease.

Technical Specifications

Cycle Type	24-Hour
Mechanism	Mechanical with adjustable tappets
Common Applications	Lighting, Heating, Appliances

Design and Build

Key Features

- Rotating dial interface
- Protective enclosure
- Clear protective cover
- Easy installation design
