Product Overview

High-Velocity Industrial Cooling

This 24-inch industrial drum fan is engineered for powerful air circulation in demanding environments like workshops, garages, and warehouses. Featuring a robust all-metal construction and a high-velocity motor, it delivers reliable performance for long-term use. The unit includes convenient mobility features and adjustable tilt angles to direct airflow exactly where required.

Performance Specifications

Motor Power

0.125 HP
Motor Output

Tilt Adjustment

360 degrees

Construction & Design

Key Features

- Auto-reset thermal protection
- Durable handle for mobility
- Integrated wheels for easy transport
- High-velocity airflow design

Fan Diameter

24 inches

Material Composition

All-metal structure, Metal coated grill, 100% Copper wire motor

Applications

Suitable Environments

Workshops • Garages • Warehouses • Commercial Settings
