Product Overview

Professional Demolition and Prying Tool

This 24-inch wrecking bar is engineered for heavy-duty demolition, prying, and fastener removal in professional construction environments. Constructed from high-strength forged steel, it features a dual-end design including a chisel point for breaking and a precision claw for efficient nail extraction. With a 16mm shaft diameter, it provides optimal leverage and durability for demanding renovation and general construction tasks.

Technical Specifications

Length	24 inch
Shaft Diameter	16 mm
Surface Finish	Black corrosion-resistant coating
Key Features	Forged Steel, Dual-end Design, Nail Puller, Chisel Point
