

24-Liter Thermoelectric Cooler and Warmer

This thermoelectric cooler and warmer has a 24-liter capacity and can cool to 18-20°C below ambient temperature or heat to 65±5°C. It features green/red LEDs to indicate cooling or warming modes and is suitable for AC220V/110V or DC12V power supplies.

Product Overview

Versatile Thermal Control

The 24-liter thermoelectric cooler and warmer is designed for maximum versatility, serving as an ideal solution for home, office, and mobile use. This unit offers both cooling and heating capabilities, maintaining temperatures 18-20°C below ambient for cooling and reaching 65±5°C for warming. With dual power support (AC/DC) and a built-in temperature display, it provides reliable performance for camping, road trips, and daily convenience.

Technical Specifications

Power Consumption

40 W

Min Power

65 W

Max Power

Capacity	24 L
Cooling Performance	18-20°C below ambient temperature
Heating Performance	65±5°C via thermostat

Power & Operation

Status Indicators

- Green LED (Cooling mode)
- Red LED (Warming mode)

Power Supply Compatibility	AC 220V, AC 110V, DC 12V
