

24-Port FTP Cat.5e Patch Panel

This FTP Cat.5e patch panel provides 24 shielded ports for reliable network connections. Designed for standard 19-inch rack mounting, it ensures high-performance data transmission and minimizes electromagnetic interference.

Overview

High-Performance Network Connectivity

This 24-port FTP Cat.5e patch panel is engineered for reliable network performance in structured cabling environments. Featuring shielded ports, it effectively minimizes electromagnetic interference to ensure high-speed data transmission. Designed for standard 19-inch rack mounting, it offers a robust solution for managing Ethernet connections with ease.

Technical Specifications

Category Standard

Cat.5e

Number of Ports

24

Shielding

FTP (Foiled Twisted Pair)

Rack Compatibility

19-inch

Features

Key Features

- 24 shielded ports for EMI protection
- Standard 19-inch rack mount design
- Supports high-speed Ethernet applications
- Integrated cable management
- Clear port labeling
