

240-270W Polycrystalline Solar Panel

This high-efficiency polycrystalline solar panel is designed for various applications. The panel features 60 cells of 6-inch poly material and offers a power output ranging from 240W to 270W.

Product Overview

High-Efficiency Solar Power

This polycrystalline solar panel is engineered for versatility and reliable energy generation in both grid-tied and off-grid configurations. Featuring 60 high-quality 6-inch cells, it delivers a robust power output range of 240W to 270W. Designed to meet the demands of residential, commercial, and industrial applications, this panel provides a sustainable energy solution backed by international quality standards.

Technical Metrics

Power Output

240 W Minimum Power	270 W Maximum Power
-------------------------------	-------------------------------

Cell Configuration	60 cells
Cell Material	6-inch Polycrystalline

Applications

Use Cases	Residential, Commercial, Industrial, Grid-tied Systems, Off-grid Systems
