

2400W Electric Garden Shredder

This 2400W electric shredder is designed for efficient garden waste processing. It features a robust cutting mechanism and a large collection box, with a portable design including wheels.

Overview

High-Performance Garden Shredding

This 2400W electric garden shredder is engineered for efficient garden waste processing, transforming branches and debris into manageable material. Equipped with a powerful aluminum brush motor and a large 45L collection capacity, it is designed for consistent performance. The unit prioritizes user safety with integrated overcurrent protection, an electromagnetic switch, and an interlock device to prevent accidental operation.

Technical Performance

Power Output

2400 W
Power

4100 rpm
Rotational Speed

Max Cutting Diameter	45 mm
Motor Type	Brush motor (Aluminum)

Electrical & Connectivity

Voltage/Frequency	230-240V / 50Hz
Plug & Cable	VDE plug with 0.13m PVC cable

Design & Features

Collection Bag Capacity	45 L
Safety Features	Overcurrent Protection, Electromagnetic Switch, Interlock Device
Maintenance Design	Rotatable and openable body for blade cleaning
