

24.5 cm³ 4-Stroke Engine Handheld Blower Vacuum

This handheld blower vacuum features a 4-stroke engine and spring connecting structure for shock absorption. Its double-faced impeller enhances wind power for efficient cleaning.

Product Overview

High-Efficiency 4-Stroke Blower Vacuum

This handheld blower vacuum is engineered for professional-grade outdoor cleanup, featuring a robust 4-stroke engine that balances high performance with user comfort. Designed to optimize efficiency, it delivers increased air volume and power while significantly reducing vibration, noise, and fuel consumption. It is an ideal solution for tasks requiring reliable, lower-emission operation.

Technical Specifications

Power Output

0.6 kW

Power Output

0.82 hp

Horsepower

Engine Displacement	24.5 cm ³
Average Air Volume	0.15 m ³ /s

Compliance & Standards

Certifications

CE • EURO II • EMC

Key Features

Operational Benefits

- Easy starting mechanism
- Reduced noise levels
- Lower fuel consumption
- Minimized vibration
- Low emissions profile

Engine Type	4-Stroke
