

245W On-Grid Solar Module

This solar module is suitable for on-grid system project use. It is engineered with advanced photovoltaic technology to maximize power output and ensure long-term reliability.

Overview

High-Performance Solar Solution

The 245W On-Grid Solar Module is engineered with advanced photovoltaic technology to maximize power output and ensure long-term reliability. Designed for both residential and commercial applications, this polycrystalline module offers an excellent power-to-area ratio. Its robust construction, featuring a durable frame and high-transparency glass, provides enhanced protection and optimal light capture, making it a cost-effective choice for renewable energy generation.

Technical Specifications

Cell Technology

Polycrystalline

Features

Key Benefits

- Sturdy construction for long-term reliability
- Easy installation process
- Cost-effective design
- High-transparency glass for optimal light capture

Suitable Applications

Residential, Commercial, On-Grid
