

# 24kW Diesel Welding Generator

This heavy-duty unit provides both welding capabilities and electrical power generation. It features a robust construction for durability and reliability in demanding environments.

## Product Overview

### Industrial Welding & Power Solution

The JDP24GF-LDEW is a high-performance, heavy-duty welding and generating set engineered for demanding industrial environments. It provides reliable dual-functionality, delivering both robust electrical power generation and precise welding capabilities. Designed with durability in mind, this unit ensures efficient performance and simplified maintenance for professional operations.

## Performance Metrics

### Power Output

**24 kW**

Rated Power Output

**540 A**

Welding Current

## Technical Details

Model Number	JDP24GF-LDEW
Equipment Type	Diesel Powered, Welding Set, Generator
