

24V 1.3Ah Rechargeable Lead-Acid Battery

This is a sealed rechargeable lead-acid battery with a 1.3Ah capacity at 24V. It offers short circuit protection and safe charging due to its sealed container.

Product Overview

Reliable Power Solution

This 24V rechargeable lead-acid battery offers a dependable power source for various applications requiring a 1.3Ah capacity. Designed as a sealed, maintenance-free unit, it ensures ease of use and long-term reliability in professional environments. The battery includes integrated safety features to prevent short circuits and is built for secure, stable performance.

Technical Specifications

Maintenance

Maintenance-Free

Rated Voltage	24 V
Capacity	1.3 Ah
Battery Chemistry	Sealed Lead-Acid (SLA)

Safety & Handling

Safety Features

- Short circuit protection
- Sealed container design
- Spark and flame resistant

Disposal Requirements	Recycling Required, Lead Content (Pb)
