

24V DC 2200mAh Ni-MH Battery Pack

This Ni-MH battery pack operates at 24V DC with a 2200mAh capacity. It is designed for reliable power and should be recycled or disposed of properly.

Overview

High-Performance Ni-MH Power Solution

This 24V DC battery pack utilizes advanced Nickel-Metal Hydride (Ni-MH) technology to provide reliable and consistent power for demanding applications. With a robust 2200mAh capacity, it is engineered to deliver sustained performance in a compact form factor. Designed for professional use, this battery pack meets essential industry standards for safety and quality.

Technical Specifications

Voltage	24 V DC
Capacity	2200 mAh
Chemistry	Ni-MH (Nickel-Metal Hydride)
Cell Size	AA

Compliance & Safety

Certifications	UL Certified (MH46026)
Disposal Requirements	Must be recycled or disposed of properly according to local regulations.
