

24V DC Brush Motor, 4200 RPM

This is a 24V DC brush motor. It operates at 4200 RPM and has a 5A current rating.

Product Overview

High-Performance 24V DC Brush Motor

This 24V DC brush motor is engineered for applications requiring reliable performance and consistent speed control. Operating at 4200 RPM, it delivers a steady output suitable for various industrial and automation tasks. Its robust design ensures durability, making it a dependable component for your machinery needs.
