

2.5-Inch Vehicle Suspension Coil Lift Kit

This kit provides a 2.5-inch lift to a vehicle's suspension system. It includes coil springs and sway bar links to improve off-road performance and accommodate larger tires; shocks are not included.

Product Overview

Rugged Suspension Enhancement

This 2.5-inch suspension coil lift kit is engineered to provide superior ground clearance and off-road capability for your vehicle. Designed for flexibility, this kit allows users to pair their own preferred shock absorbers with high-quality coil springs and sway bar links. The components are built from durable materials, ensuring they can withstand rugged terrain and maintain consistent performance over time.
