

2.5 Ton Container Handling Forklift

This 2.5 ton H-type forklift truck is designed for container handling. Its compact design allows for maneuverability in confined spaces, while its high lifting capacity ensures versatility for various load types.

Overview

Container Handling Efficiency

The CPC25H is a 2-3 ton H-type forklift truck specifically engineered for container handling operations. Featuring a robust chassis and powerful engine, it provides efficient lifting and transportation capabilities. Its compact design ensures high maneuverability in confined spaces, while advanced safety systems like load-sensing hydraulics and an operator presence system guarantee reliable performance.
