

# 250 PSI AWWA C509 Gate Valve

This 250 PSI gate valve conforms to AWWA C509 standards. It is designed for waterworks applications, providing reliable shutoff and control of fluid flow.

## Overview

### Reliable Flow Control for Waterworks

The 250 PSI Gate Valve is engineered to meet rigorous AWWA C509 standards, ensuring optimal performance in demanding water distribution systems. Designed for robust shutoff and fluid control, this valve features heavy-duty construction and secure flanged connections. It is an ideal solution for industrial processes and municipal water infrastructure requiring consistent, positive shutoff capabilities.

## Technical Specifications

### Pressure Rating

**250 PSI**  
Max Pressure

### Standard Compliance

AWWA C509

### Suitable Applications

- Water distribution systems
- Industrial fluid processes
- Municipal waterworks

### Connection Type

Flanged
