

2500kg Capacity Hydraulic Pallet Truck

This manual hydraulic pallet truck is designed for lifting and moving pallets. It features a robust steel frame, ergonomic handle, and durable wheels for smooth transport.

Product Overview

Professional Material Handling Solution

This hydraulic pallet truck serves as an ideal storage aid for a variety of manual transport tasks across short distances in stores, warehouses, and factory plants. Featuring a compact and attractive design, it is engineered for maximum durability and ease of use. The robust construction ensures reliable performance in demanding industrial environments.

Technical Specifications

Maximum Load Capacity

2500 kg
Capacity

Design & Build

- Compact and attractive design
- High-quality powder coating
- Chromed bearing bushes and joints
- Greased pivot points for maneuverability

Performance

Suitable Environments

Retail Stores • Warehouses • Factory Plants

Operational Benefits

Quiet Running, Effortless Steering, Long Service Life, Excellent Maneuverability
