

# 250A Drawout Busbar Molded Case Circuit Breaker

This 250A molded case circuit breaker is designed for drawout busbar type installations. It features a high breaking capacity and is suitable for systems with voltages of 415V, 500V, and 690V.

## ADDITIONAL IMAGES

## Overview

### Professional Grade MCCB

This 3-phase molded case circuit breaker is engineered for robust performance in drawout busbar installations. It offers versatile current ratings and high breaking capacity, making it suitable for demanding industrial and commercial electrical systems. Designed for reliability, it features a manual 'Push to Trip' mechanism and adheres to international safety and quality standards.

## Electrical Ratings

### Rated Current Range

- 125
- 140
- 160
- 180
- 200
- 225
- 250

### Breaking Capacity (Icu/Ics)

Voltage (V)	Capacity (kA)
415	70/70
500	40/40
690	20/20

### Key Performance Metrics

**1150 V**

Insulation Voltage (Ui)

**12 kV**

Impulse Voltage (Uimp)

**50 Hz/60Hz**

Frequency

## Technical Specifications

Number of Poles	3
Over Current Release Type	Thermal-magnetic
Mechanical Life	20000 cycles
Electrical Life	8000 cycles

## Compliance

Certifications CCC • CB • CE • TÜV	
Standards Compliance	IEC/EN 60947-2, GB/T 14048.2
