

250A Molded Case Circuit Breaker

This MCCB is designed for AC 50/60Hz circuits with a rated current up to 400A. It distributes electrical energy and infrequently makes and breaks circuits under normal conditions.

Overview

Reliable Circuit Protection

The DAM4 series molded case circuit breaker is designed for efficient energy distribution and reliable circuit protection in AC 50/60Hz systems. Built for industrial and commercial environments, it handles infrequent making and breaking of circuits under normal operating conditions. This unit is fully compliant with IEC60947-2 standards, ensuring safety and performance.

Technical Specifications

Rated Current

250 A

Rated Current

Rated Operational Voltage (Ue)	Up to 690V AC
Insulation Voltage (Ui)	690 V
Frequency	40-60 Hz

Compliance & Standards

Industry Standards	IEC60947-2
--------------------	------------

Features

Protection Features

- Thermal-magnetic trip unit
- Overload protection
- Short-circuit protection
- Integrated test button
