

250A Molded Case Circuit Breaker

This 250A molded case circuit breaker provides electrical protection. It automatically interrupts the flow of electricity during an overload or short circuit.

Product Overview

250A Molded Case Circuit Breaker

This 250A molded case circuit breaker is engineered for robust electrical protection in industrial and commercial environments. Designed to automatically interrupt electrical flow during overloads or short circuits, it serves as a critical safety component to prevent equipment damage and mitigate fire risks. Its durable construction ensures reliable performance and longevity in demanding electrical systems.

Technical Specifications

Rated Current

250 A

Rated Current

Model Identifier

SA203B

Product Type

Molded Case Circuit Breaker (MCCB)

Features

Key Features

- Automatic overload protection
- Short circuit interruption
- Robust industrial construction
- Reliable electrical safety

Applications

Suitable Environments

Industrial, Commercial
