Overview

Heavy-Duty 250cc Cargo Solution

The DB250ZH-4A is a robust cargo tricycle engineered for high-capacity material transport and heavy-duty hauling. It features a specialized double-wheel rear axle for superior stability and a self-dumping cargo bed to streamline unloading processes. Designed for demanding work environments like construction sites and farms, this vehicle combines a powerful 250cc engine with a durable chassis for reliable performance across various terrains.

Rear Axle Configuration

Double Wheel • Enhanced Stability

Model Number

DB250ZH-4A

Unloading Mechanism

Self-Dumping Cargo Bed

Key Features

Core Features

- High load capacity for heavy-duty hauling
- Rugged chassis and frame construction
- User-friendly controls for ease of operation
- Optimized load distribution via double-wheel design
- Efficient material transport and manual labor reduction

Applications

Recommended Use Cases

Construction Sites, Farms, Industrial Settings, Material Transport
