

250cc Naked Street Motorcycle

This is a naked street motorcycle with a 250cc, single-cylinder, liquid-cooled engine. It features fuel injection, disc brakes, and a digital instrument panel for urban riding.

Product Overview

Performance and Design

This 250cc naked street motorcycle is engineered for urban agility and responsive handling. Featuring a liquid-cooled, 4-stroke single-cylinder engine and a lightweight trellis frame, it delivers a balanced power-to-weight ratio for city commuting and spirited riding. With its modern styling and performance-oriented components, it offers a compelling option for professional buyers seeking a reliable and agile street bike.

Engine & Performance

Key Performance Metrics

26 hp/rpm

Max Power

22.8 N.m./rpm

Max Torque

249.6 cc

Displacement

Engine Specifications

- 4 Strokes, Liquid Cooled Cylinder
- Compression Ratio: 11.5 : 1
- Valve Train: 4V OHC

Drivetrain & Ignition

Drivetrain Configuration

- 6 Speeds Gear Change
- Wet Type and Multi-Plates Clutch
- 1-N-2-3-4-5-6 Gear Shift Pattern
- Cushioned Final Drive

Ignition and Fuel
