

2.5/3 Ton Hydraulic Floor Jack

This floor jack is designed for lifting vehicles and comes in 2.5 ton and 3 ton models. It features a hydraulic system and durable steel construction.

Product Overview

Professional Hydraulic Floor Jack

This heavy-duty hydraulic floor jack is engineered for reliable vehicle lifting in professional garage and workshop environments. Designed to support loads up to 2.5 to 3 tons, it features a low-profile minimum height of 75mm for easy access under various vehicle chassis. With a controlled slow-down function and robust construction, this tool ensures both operational safety and durability for demanding automotive maintenance tasks.
