

254mm Jointer and Thickness Planer with 1500W Motor

This 254mm (10-inch) jointer and thickness planer is powered by a 1500W motor. It combines the functionality of a jointer for flattening edges and faces with a thickness planer for creating consistent material thickness.

Product Overview

Dual-Function Woodworking Efficiency

This 254mm (10-inch) jointer and thickness planer is designed to streamline woodworking workflows by combining two essential functions in one unit. Powered by a robust 1500W motor, it delivers precise material flattening and consistent thicknessing for professional results. Compact yet capable, it is an ideal solution for workshops needing to maximize space without sacrificing performance.

Technical Specifications

Motor Power

1500 W
Input Power

9000 RPM
No Load Speed

Electrical Requirements

230V, 50Hz

Capacity & Performance

Cutting Capabilities

Feature	Jointer	Planer
Max Cutting Depth	3mm	2mm
Max Cutting Width	254mm	254mm

Material Handling

- Max Material Length: 1000mm
- Thickness Range: 5-120mm
- Feeding Speed: 6m/min

Dimensions

Table Sizes

- Jointer Table: 946 x 263mm
- Planer Table: 270 x 303mm

Logistics

Packaging

Brown Carton
