

255mm Miter Saw for Woodworking

This miter saw is designed for woodworking and construction. It features adjustable bevel and miter angles for creating accurate cuts.

Product Overview

Precision Cutting Performance

The J1G-ZP2-255 Miter Saw is a high-performance precision tool engineered for demanding woodworking and construction applications. Equipped with a robust motor, it efficiently handles a variety of materials including wood, plastic, and aluminum. The design prioritizes accuracy through adjustable bevel and miter angles, while safety is ensured via an integrated blade guard and secure clamping system.

Technical Specifications

Blade Diameter	255 mm
Compatible Materials	Wood, Plastic, Aluminum

Features

Key Capabilities

- Adjustable bevel angles
- Adjustable miter angles
- Secure clamping system
- Integrated blade guard
- Ergonomic design for reduced fatigue
