Product Overview

Industrial-Grade Silent Power

This 25kVA water-cooled silent diesel generator provides reliable power solutions for industrial, home, and emergency applications. Engineered with a compact design and high-quality canopy, it ensures quiet operation suitable for locations ranging from construction sites to residential settings. The unit features robust construction with high-durability paint and advanced monitoring systems, making it an ideal choice for both standby and main power needs.

Technical Specifications

Performance Metrics

25 kVA

Rated Power

20 kW

Rated Output

213 g/kw.h

Fuel Consumption

Core Components

Component	Standard Options
Engine	Isuzu
Alternator	Stamford / Mecc Alte
Controller	Deepsea / Smartgen

Build Quality

Canopy & Durability

- Cold-rolled steel silent canopy construction
- Pickling and phosphating anti-corrosion pre-treatment
- High-durability paint finish
- Integrated forklift slots for easy transport

Operational Details

Quality Assurance

50% Load Test • 75% Load Test • 100% Load Test • 110% Load Test

Ideal Applications

Industrial, Construction, Real Estate, Hospital, Telecom, Emergency Backup
