

2.5kW Portable Gasoline Generator

This single-phase gasoline generator delivers a maximum output of 2.5kW. It features a 170F engine with single-cylinder, forced air-cooled, 4-stroke OHV design and AVR voltage regulation.

Overview

Reliable Portable Power

This single-phase portable gasoline generator is designed to provide dependable power for backup applications or remote locations without grid access. With a robust 93.5cc engine and a 6.0L fuel tank, it offers a practical balance of portability and runtime. Equipped with a clear voltmeter and standard AC220V outlets, this generator ensures safe and easy operation for professional and residential users alike.
