Overview

Reliable Power Solution

This 2.5kW single-cylinder diesel generator is designed to provide a stable and consistent power supply for diverse applications, including construction sites, outdoor events, and emergency backup scenarios. It features a robust, compact frame for easy transport and storage, alongside efficient fuel consumption for long-lasting performance. The unit is equipped with comprehensive safety features, including overload protection and low oil monitoring, ensuring reliable operation when you need it most.

Technical Specifications

Rated Power

2.5 kW

Power Output

Engine Type Air-cooled single-cylinder diesel engine

Frequency 50 Hz

Electrical Output

AC Output 230V

DC Output 12V / 8.3A

Control & Safety

Control Panel Components

- Engine Switch (ON/OFF/START)
- Volt Meter
- AC Circuit Breaker
- DC Circuit Breaker
- Oil Alert Lamp

Safety Features

Oil Alert Lamp, AC Breaker, DC Breaker, Low Oil Shutdown

Maintenance

Maintenance Access

- Fuel Drain
- Oil Drain
