

25kW Triple-Phase Solar Inverter

This 25kW solar inverter is designed for solar power systems. It features triple-phase operation for optimal performance and grid compatibility.

Product Overview

High-Efficiency Solar Power Conversion

This 25kW triple-phase solar inverter is engineered to deliver reliable and efficient conversion of DC energy from solar panels into usable AC power. Designed for versatility, it supports residential, commercial, and industrial solar applications with seamless grid compatibility. The unit features multiple PV inputs and integrated communication interfaces to ensure optimal performance and ease of system monitoring.

Technical Specifications

Rated Power Output

25 kW
Capacity

Phase Configuration

Triple-Phase

Suitable Applications

Residential, Commercial, Industrial

System Integration

Connectivity & Inputs

- Multiple PV Inputs
- Dedicated Communication Interface
- Integrated AC Output
