

## 25L Double Wall Stainless Steel Coffee Urn

This 25L electrothermique barrel urn is constructed of double-wall stainless steel. It functions as a coffee percolator suitable for use in restaurants and factories, ensuring consistent brewing and dispensing.

### ADDITIONAL IMAGES

### Product Overview

#### High-Efficiency 25L Coffee Urn

This 25L double-wall stainless steel coffee urn is designed for high-demand environments like restaurants and industrial kitchens. The double-wall construction combines an inner #304 stainless steel lining with a robust outer shell to ensure superior heat retention and energy efficiency. Equipped with safety features like double overheat protection and a waterproof power switch, this unit provides reliable, consistent brewing throughout the day.

### Technical Specifications

Capacity	25 L
Inner Wall Material	#304 Stainless Steel
