

2.5mm Copper Electrical Wire, 100m

This electrical wire is made from 100% copper. It is a single 2.5mm strand, 100 meters in length, and rated for 450/750V.

Product Overview

General Purpose Electrical Wire

This 2.5mm copper electrical wire is designed for versatile applications, including power, lighting, and control wiring. It is suitable for installation within trunking and conduit systems, making it an ideal choice for building infrastructure. With a 100-meter length, it provides reliable performance for professional electrical installations.

Technical Specifications

Conductor Size	2.5 mm
Total Length	100 m
Voltage Rating	450/750V
Material	100% Copper

Application & Usage

Installation Methods

- Trunking
- Conduit

Primary Applications	Power Transmission, Lighting, Control Wiring, Building Wire
