

26-inch Aluminum Alloy Mountain Bike with Shimano Components

This mountain bike has a lightweight alloy frame and a front suspension fork for enhanced shock absorption. Reliable disc brakes provide superior stopping power, and Shimano components ensure smooth and precise gear changes.

Overview

Performance and Durability

This 26-inch mountain bike is engineered for versatility and control across various terrains. Featuring a lightweight aluminum alloy frame and a front suspension fork, it provides excellent shock absorption for a smoother ride. With reliable disc brakes and precision gear shifting components, this bicycle is built to deliver consistent performance for both recreational cycling and adventurous trails.

Technical Specifications

Wheel Size	26 inch
Frame Material	Aluminum Alloy
Braking System	Disc Brakes
Suspension	Front Suspension Fork

Components

Drivetrain Components
Shimano

Features

Key Features

- Lightweight alloy frame construction
- Advanced shock absorption fork
- High-performance disc brakes
- Precision gear shifting
