

26-Inch Step-Through Electric City Bicycle

This electric bicycle has a 26-inch aluminum frame and a step-through design. It is equipped with a 24V/250W brushless motor and a 24V/8AH Ni-MH battery.

Overview

Designed for Urban Mobility

This 26-inch electric city bicycle features a convenient step-through frame design, engineered for easy mounting and dismounting in busy urban environments. The bike prioritizes rider comfort with an upright handlebar position and front suspension to absorb road imperfections. Equipped with a rear-mounted battery and integrated luggage rack, it serves as a practical solution for daily commuting and carrying essential items.
