

## 26-Piece Non-Sparking Tool Set

This 26-piece non-sparking tool set is designed for use in potentially explosive environments. The tools are made from aluminum bronze and beryllium copper alloys, which are non-magnetic and corrosion-resistant.

### Product Overview

#### Safety-First Engineering

This 26-piece non-sparking tool set is engineered for high-risk environments where safety is the top priority. Crafted from specialized aluminum bronze and beryllium copper alloys, these tools provide essential non-magnetic and corrosion-resistant properties. The comprehensive kit includes a versatile range of screwdrivers, pliers, wrenches, and a hammer, all housed in a durable, organized carrying case suitable for oil, gas, mining, and chemical processing industries.

### Technical Specifications

#### Key Features

Non-Sparking • Non-Magnetic • Corrosion-Resistant

#### Total Pieces

26

#### Material Composition

Aluminum Bronze, Beryllium Copper

### Included Tools

#### Included Components

- Screwdrivers
- Pliers
- Wrenches
- Hammer
