

260mm Welded Diamond Saw Blade for Marble

This blade is used for cutting marble with high sharpness and efficiency. It provides clean cut edges and durable cutting performance on marble.

Product Overview

Professional Marble Cutting Solution

This 260mm welded diamond saw blade is engineered for high-precision cutting of marble materials. It delivers exceptional sharpness and high-efficiency performance while ensuring perfectly clean cut edges without material breakout. Designed for durability, this blade is compatible with both manual and automatic cutting machinery.

Technical Specifications

Dimensions (Ø x Bore x Thickness)

260 mm
Diameter

60 mm
Bore

2 mm
Thickness

Tooth Configuration

18 T

Construction

Welded

Safety and Compatibility
