

# 26mm Electric Rotary Hammer Drill

This is a hammer drill designed for impact and rotary applications. It features a robust motor for efficient power delivery and effective drilling in concrete, masonry, and other hard materials.

## Overview

### High-Performance Rotary Hammer

This 26mm electric rotary hammer drill is engineered for demanding drilling and impact applications in professional environments. Powered by a robust 800W motor, it delivers consistent performance across concrete, masonry, steel, and wood. Featuring an ergonomic design and variable speed control, this tool ensures precise operation while minimizing user fatigue during extended use.

## Technical Specifications

### Single Hammering Force

**3 J**

Impact Energy

### Clamping System

SDS-PLUS

### Input Power

800 W

### Weight

2.7 kg

## Performance Metrics

### Drilling Capacities

Material	Max Diameter
Concrete	26 mm
Masonry (Hollow Bit)	68 mm
Wood	30 mm
Steel	13 mm

### Speed and Impact Rate

- Rated Speed: 0 - 1150 rpm
- Hammer Rate: 0 - 5100 bpm

### Optimal Drilling Range

8 - 16 mm

## Features

### Features

Chiseling Function, Variable Speed Control, Depth Rod Included
