

27.5-inch Carbon Fiber Mountain Bike with Hydraulic Brakes

This mountain bicycle features a carbon frame and 27.5-inch wheels with CST 27.5x2.4 tires. It is equipped with hydraulic brakes and a suspension front fork for enhanced shock absorption.

Overview

High-Performance Carbon Mountain Bike

Engineered for demanding trails and versatile riding, this 27.5-inch mountain bike features a lightweight carbon fiber frame paired with a high-performance air suspension fork. It is equipped with a powerful mid-drive motor and a reliable 11-speed drivetrain, ensuring smooth gear transitions across various terrains. With advanced hydraulic braking and a long-range lithium battery, this bike offers both safety and endurance for serious riders.
