

# 275 kVA Diesel Generator Set

This diesel generator set provides a reliable power output of 275 kVA at 60 Hz. It is designed for ease of maintenance and long service life with its heavy-duty diesel engine and high-efficiency alternator.

## Overview

### Reliable Industrial Power Solution

This 275 kVA diesel generator set is engineered for consistent, continuous power generation in demanding industrial and commercial environments. Built with a heavy-duty engine and a high-efficiency alternator, it delivers dependable performance and stable power output. The unit includes an integrated cooling system and a durable steel base frame, ensuring a long service life and ease of maintenance for professional operations.

## Performance Metrics

### Rated Power Output

**275 kVA**

Frequency

## Technical Specifications

### Construction Features

- Heavy-duty diesel engine
- High-efficiency alternator
- Durable steel base frame
- Integrated cooling system

### Operational Features

Continuous Power, Industrial Grade, Commercial Application, Easy Maintenance

## Control & Safety

### Control Panel

Comprehensive control panel included for real-time monitoring and system protection, ensuring safe and efficient operation.
