

275 KVA Soundproof Diesel Generator with Deepsea Controller

This 275 KVA diesel generator provides reliable power. It features a robust design, advanced noise reduction technology, Deepsea Controller, and a Perkins diesel engine.

Overview

High-Performance Soundproof Power Solution

This 275 KVA diesel generator is engineered for reliable, continuous power generation in noise-sensitive environments. Featuring a robust soundproof enclosure, it maintains a quiet 74db operation level while delivering consistent performance. Equipped with an advanced digital controller and high-efficiency engine components, this unit is designed to meet rigorous industrial standards for stability and operational safety.

303 KVA
Standby Power

Rated Current 397 A

Noise Level 74 db

Technical Specifications

Core Components

Component	Model/Type
Engine Model	1606A-E93TAG4
Alternator	HCI444D

Available Voltage Configurations

- 50Hz: 400/230V, 415/240V, 380/220V, 220/127V, 200/115V
- 60Hz: 480/227V, 440/254V, 220/117V, 208/120V

Operating Speed	1500/1800 RPM
-----------------	---------------

Frequency	50/60Hz
-----------	---------

Compliance & Support

Certifications	CE, ISO 9001, SGS, BV
----------------	-----------------------

Warranty Coverage	1 year or 1200 running hours
-------------------	------------------------------
