Overview

Industrial Power Solution

This 275 kVA three-phase diesel generator is engineered for reliable and efficient power generation in demanding industrial and commercial environments. Designed with a robust soundproof enclosure, it effectively minimizes noise pollution while ensuring stable operation. The system is equipped with advanced monitoring and protection controls, making it an ideal choice for backup, prime, or continuous power supply needs.

Technical Specifications

Power Output

275 kVA
Power Rating

Phase Configuration	Three-Phase
Noise Control	Yes
Suitable Applications	Industrial, Commercial, Backup Power, Prime Power, Continuous Power

Design & Build

Enclosure Features

- Soundproof design
- Integrated ventilation
- Service access doors
- Integrated control panel
- Stable base mounting

Quality & Standards

Compatible Engine Manufacturers

- Cummins
- Perkins
- SDEC
- Doosan
- FAWDE
