

27mm Claw Hammer with Ergonomic Grip

This claw hammer features a durable steel head with a 27mm striking face, ideal for driving nails and demolition work. The ergonomically designed handle provides a comfortable and secure grip, reducing fatigue during extended use.

Product Overview

High-Performance Claw Hammer

Designed for professional durability and comfort, this 27mm claw hammer features a forged high-carbon steel head for extended tool life. The handle is crafted from a combination of PP and TPR materials, offering an ergonomic, soft-rubber grip that mimics the feel of wood while effectively reducing vibrations. This tool is optimized for efficient nail driving and removal, making it a reliable choice for demolition and construction tasks.

Technical Specifications

Head Size	27 mm
Weight	0.84 kg
Head Material	45# Carbon Steel
Handle Material	PP + TPR

Key Features

Key Benefits

- Ergonomically designed handle for reduced fatigue
- Vibration-dampening handle construction
- Forged high-carbon steel for superior durability
- Optimized claw geometry for efficient nail removal

Application Suitability	Demolition, Nail Driving, Construction, Professional Use
