

28 Liter Thermoelectric Cooler and Warmer

This thermoelectric device cools up to 18-20°C below ambient temperature and heats up to 65±5°C. It features a 28-liter capacity and is compatible with AC220V/110V and DC12V power supplies.

Product Overview

Versatile Thermal Solution

The 28 Liter Thermoelectric Cooler and Warmer is a high-performance, dual-function appliance designed for diverse environments. It offers reliable temperature control suitable for home, office, and mobile use in vehicles. With its flexible power options and intuitive operation, it provides an efficient solution for keeping food and beverages at the desired temperature during daily commutes or outdoor activities.

Technical Specifications

Cooling Capacity

20 °C

Cooling below ambient

Heating Capacity	65 °C
Power Consumption	65 W
Total Capacity	28 L

Operational Features

Status Indicators

Green LED (Cooling) • Red LED (Heating)

Supported Power Supplies	AC 220V, AC 110V, DC 12V
