

2800W Gasoline Generator with Copper Wire

This generator provides a robust power solution for various applications. It delivers 2800 rated watts and 3000 surge watts, suitable for powering multiple devices.

Product Overview

Robust Power Solution

This generator is a reliable power solution designed for versatile applications. Built with high-quality components, it features a generator core utilizing 100% copper wire and advanced technology for efficient performance. With a rated output of 2800 watts and surge capacity up to 3000 watts, it is well-suited for powering multiple devices simultaneously.

Technical Specifications

Winding Material	100% Copper Wire
AC Output	230V

Control & Safety

Integrated Protection	Voltmeter, Circuit Breaker, Engine Switch
-----------------------	---

Maintenance

Maintenance Access

- Easy Lube-Oil Access
