

2800W Gasoline Generator with Electric Start

This gasoline generator provides a rated output of 2800 watts and a surge output of 3100 watts. It is equipped with a 4-stroke fuel tank, electric starting, an OHV engine, and an AVR alternator.

Overview

Reliable Power Generation

This 2800W gasoline generator is designed for consistent and dependable power output, suitable for a variety of professional and residential applications. Featuring a robust 4-stroke OHV engine and an electric start system, it ensures easy operation and efficient fuel consumption. With a 15L fuel tank, it provides extended runtimes to keep your essential equipment powered during outages or on remote job sites.
