

# 29.2V 15A Lithium LiFePO4 Battery Charger for 24V Systems

This lithium LiFePO4 battery charger is engineered for 24V (8S) battery packs, delivering a 29.2V output at 15A. It ensures safe and consistent charging for various applications.

## ADDITIONAL IMAGES

## Overview

### High-Efficiency 24V LiFePO4 Charging Solution

This C600 series charger is a high-performance solution designed specifically for 24V (8S) Lithium LiFePO4 battery systems. Engineered with a robust aluminium alloy shell, it delivers a powerful 15A output to ensure fast and efficient charging for demanding applications. Ideal for electric motorcycles, scooters, and e-bikes, it combines reliability with a compact form factor for professional B2B use.

## Technical Performance

### Key Performance Metrics

**29.2 V**

Output Voltage

**15 A**

Charging Current

**500 W**

Output Power

### Input Voltage

- 110-132VAC
- 200-264VAC

## Compatibility & Application

### Primary Applications

- Electric Motorcycle
- Electric Scooter
- E-bike

### Compatible Battery Types

LiFePO4, Li-ion, Lead Acid

## Physical Characteristics

### Dimensions

135 x 90 x 50 mm

### Net Weight

0.9 kg

### Enclosure Material

Aluminium Alloy

## Compliance & Support

### Certifications

CE • RoHS

### Warranty

12 Months

### Socket Standard

Customizable to any country standard
