Product Overview

High-Performance Smart Charger

This C600B smart fast charger is engineered for reliable and efficient battery management, specifically optimized for Li-ion battery systems. Housed in a durable aluminum alloy casing, it provides stable power output and features integrated LED status indicators for monitoring the charging cycle. Designed for versatility, this unit is suitable for various applications including electric motorcycles, scooters, and e-bikes.

Technical Specifications

Output Performance

29.2 V
Voltage

18 A
Current

Compatible Battery Types

Li-ion • LiFePO4 • Lead Acid

Output Power

300 W

Input Voltage Range

110-132VAC, 200-264VAC

Physical Attributes

Dimensions

173 x 90 x 63 mm

Net Weight

1.35 kg

Casing Material

Aluminium Alloy

Compliance and Logistics

Certifications

CE

Primary Applications

- Electric Motorcycle
- Scooter
- E-bike

Warranty Period

12 Months
